### CAREER OBJECTIVE

A Frontend Engineer with proven experience and specialty in building responsive websites and web applications. Enthusiastic and able to work exceptionally well as an individual and in a team. Passionate about learning and development with desire to apply my skills on projects that will impact and improve the society.

### WORK EXPERIENCE

#### Frontend developer Intern

Semicolon Africa / Yaba, Lagos.

Nov 2022 – Jan 2023 / Onsite

- I assisted the team in the development, deployment, project documentation, and other tasks during various in-house projects.
- Built and maintained Web applications with a particular focus on user interface (interactions, style, etc.).
- Translated graphic design and wireframes into code.
- Participated in the analysis of development and quality at deployment, observability, and performance in production.
- Collaborated in a Scrum team
- Participated in the architectural and technological choices required for new features

#### Software Engineer Trainee

Semicolon Africa / Yaba, Lagos.

Feb 2022 – Oct 2022 / Onsite

During the 9 months intensive training I was

- introduced to Design Thinking, Critical Thinking and Industrial Design.
- introduced to Software programming with Java and JavaScript and their frameworks.
- taught about the Software Development Life Cycle (SDLC) and Design principles
- introduced to Database Management Systems with SQL/MSSQL
- paired with a team of developers to work on a cap stone project that provides a solution to the Health Sector.
