PROFILE SUMMARY

Highly skilled Frontend Developer with a strong background in crafting user-friendly websites and web applications. Proficient in translating design concepts into functional, high code while prioritizing performance optimization to ensure seamless user experiences. Experienced in creating REST APIs with Node.js and seamlessly consuming those APIs with React.js/Next.js. Committed to delivering top-quality solutions that meet and exceed project requirements.

KEY SKILLS

Programming Languages and Web Technologies: JavaScript, TypeScript, CSS/SCSS, Tailwind CSS,
Libraries and State Management: React, Redux Toolkit
Frameworks: Next.js, Express.js
Web API Development and Integration: REST API, Swagger UI
Testing: Jest
Version Control: Git
Other skills: Web App Development, Reusable Component Architecture, Design-to-Code Translation, Cross-Browser Compatibility, Quality Assurance and Performance Optimization, SDLC, Agile Team Collaboration (Scrum),

WORK EXPERIENCE

JavaScript Instructor
Eri Learn Academy, Lagos   **August 2023 – Present**
- Teach students the basics of web development with HTML, CSS and JavaScript.
- Teach the development, enhancement and performance of client-side applications with React.JS.
- Teach students how to create responsive user-facing features and front-end applications for various screens.
- Teach the students how to perform requirements analysis, identification of code metrics, code analysis, system risk analysis, usability, automation, and software reliability analysis.

Software Engineer Trainee
Semicolon Africa, Lagos   **February 2022 – October 2022**
- Provided crucial support to cross-functional teams throughout the lifecycle of various in-house projects, ensuring seamless development, deployment, and documentation processes.
- Designed, built, and maintained web applications, with a strong emphasis on enhancing user interface elements, including interactions and style, resulting in improved user experiences.
- Translated graphic designs and wireframes into functional code, bridging the gap between design concepts and fully operational web applications.
- Played a pivotal role in analysing development quality and ensuring smooth deployment, while also focusing on observability and performance optimization in production environments.
- Collaborated within a Scrum team, contributing to agile development methodologies and fostering efficient teamwork to meet project milestones.
- Participated in critical decision-making processes related to architectural and technological choices necessary for implementing new features, ensuring alignment with project goals and objectives.

EDUCATION

University of Lagos, Akoka, Lagos   **2015 - 2019**
BSc Geography
